3. THE SERVICES

3.1 TARGIT shall make the Services available and provide the Services, as applicable, in accordance with the Subscription Documents to Customer.

3.2 Customer agrees that the Subscription (including any later additions of Users, Locations, Location subscriptions, Scope of units sold/serviced and/or functionalities) is neither contingent upon the delivery of any future functionality or features nor dependent upon any oral or written public comments made by TARGIT with respect to future functionality or features.

3.3 Customer shall use the Services through Users only and shall subscribe to the number of Designers, Consumers, Locations, Location subscriptions and Scope of units sold/serviced as needed. When adding additional locations, the Customer will also incur additional setup-fees to cover collection of historical data for the additional locations if required.

3.4 A User Subscription is strictly personal for the User and may not be used by any other person i.e. by sharing of same login details. Customer may transfer a User Subscription from one person to another either:

- (a) permanently, or
- (b) temporarily, once in a period of 30 days for each User Subscription.

3.5 If Customer requires additional Users, Locations, Location subscriptions and/or Scope of units sold/serviced to the ones set out in the Subscription Documents, it may acquire additional Subscriptions from TARGIT or Reseller, as applicable. TARGIT reserves the right to refer Customer to its Reseller for its acquisition of User Subscriptions.

TARGIT shall be responsible for the management and due performance of these services.

3.7 To ensure the proper performance and functioning of the Services, TARGIT will backup Customer Data stored on the Services in accordance with the Backup Procedure and use reasonable commercial efforts to re-establish data in the event of data loss. The foregoing shall not limit or reduce Customer's obligation to ensure backup of its data, cf. Clause 8.3 below.

3.8 The content in and/or availability of specific Dashboards, Reports, Analysis etc. included in the Services may differ depending on the operational data sources (Dealer Management System, Financial application, Time registration application, CRM application, ERP system, etc.) and the customer's specific parameterization and use of these systems.

3.9 Retrieval of data for the Services from Data Providers and through Cloud Connector follows a pre-defined schedule and procedure as specified in the Data Providers document. If updating of data in the Service has taken place according to the defined schedule and procedure, and if data in the Service nevertheless gets out of sync with the data sources, for whatever reason, additional updates may be required that are not included in the Service, and for which a specific fee may be charged. The same generally applies in situations where there may be a need for updates in addition to what is included in the defined schedule and procedure.

3.10 Customer data will be stored in the Service for 5 (five) years after which they will be deleted. This period shall reset on each renewal of the Subscription. It is the sole responsibility of the Customer to ensure that any data which the Customer needs to retain for regulatory or legal purposes, and/or which the Customer wishes to retain beyond the five (5) years for other purposes, are retained and archived by the Customer independently of the Service. For the avoidance of doubt, the foregoing five (5) year retention period is a maximum (not a minimum) and operates without prejudice to (i) Customer's instructions to TARGIT under the Data Processing Agreement, and (ii) any retention period required under applicable EU or Member State law.
